investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable

investments with an environmental objective might be aligned with the Taxonomy or not.

# To what extent were the environmental and/or social characteristics promoted by this financial product met?

The investment strategy takes into account social, environmental as well as governance-related characteristics (ESG) as part of the implementation of its investment objectives, in accordance with the provisions of Article 8 of the EU Disclosure Regulation 2019/2088 (EU SFDR). These mainly include the following elements: Exclusion of serious violations of global norms, value-based exclusions based on revenue thresholds, ESG integration into fundamental company analysis, ESG stewardship through constructive company dialogue (engagement), and exercise of voting rights (proxy voting).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

# How did the sustainability indicators perform?

The sustainability indicators are represented by the minimum exclusion criteria, by ESG integration and by Stewardship (engagement and proxy voting) activities specified in the mandatory elements of the investment strategy. The mandatory exclusion criteria applied were checked by the investment monitoring system/portfolio management system and were complied with at all times.

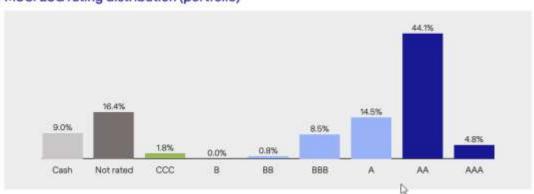

**A Global Norms:** none of the portfolio companies very exhibited severe controversies (MSCI ESG Fail status) against UN Global Compact, UN Guiding Principles on Business and Human Rights and Standards and Rights of the International Labour Organization (ILO 1+2).

**B** Value-based exclusions: all portfolio companies were within the permissible revenue tolerances. Find below the value-based exclusions overview as per June 30, 2023:

N/A

]

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The OECD Guidelines were taken into account as part of the minimum exclusion criteria (no serious violations of UN Global Compact, UN Guiding Principles on Business and Human Rights Compliance and standards and rights of the International Labor Organisation). In addition to data from MSCI ESG Research, public company data, broker research and specific exchanges with companies were also used to assess sustainability.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

# How did this financial product consider principal adverse impacts on sustainability factors?

N/A

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- \* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

Transitional activities 0%; enabling activities 0%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.
